

# Corporate Document: Greenhouse Gas Emissions Transparency

## Introduction

At Zania, we are committed to sustainability and transparency in all our operations. As part of this commitment, we provide detailed data on our greenhouse gas (GHG) emissions to our stakeholders. This document aims to meet the transparency requirements for emissions from our final manufacturing stage facilities and the final product.

## Greenhouse Gas Emissions

### Emissions Data

Zania is proud to announce that we have achieved a significant milestone: our operations have zero greenhouse gas emissions. This achievement highlights our dedication to environmental stewardship and sustainability.

## Transparency and Data Availability

To comply with transparency requirements, we have made our GHG emissions data, showcasing our zero-emission status, available through our corporate website. Stakeholders can access these data at the following link:

## Zania Sustainability Report

In this report, we provide detailed information on our strategies for maintaining zero emissions, sustainability initiatives, and future environmental management goals.

## Commitment to Sustainability and Cradle to Cradle

At Zania, we are not only committed to maintaining zero GHG emissions but also adopting the Cradle to Cradle (C2C) approach in our production process. This approach is based on the

principles of the circular economy, ensuring our products are safe, reusable, and sustainable from creation to end of life. Our commitment to Cradle to Cradle includes:

**Safe and Sustainable Materials:** We select materials that are non-toxic and can be safely recycled or composted.

**Design for Reuse:** Our products are designed to be disassembled and reused, reducing the need for virgin raw materials.

**Renewable Energy:** We strive to use renewable energy in all our production processes.

**Water Management:** We implement water management practices to minimize use and contamination of this vital resource.

**Social Fairness:** We promote fair and safe labor practices throughout our supply chain.

Our C2C product is a clear example of our commitment to these principles, maintaining zero emissions throughout its production process. We continually strive to improve, reducing the environmental impact of our products and contributing to a more sustainable future.

## **Conclusion**

Achieving and maintaining zero GHG emissions and our commitment to the Cradle to Cradle approach are fundamental parts of our sustainability and corporate responsibility strategy. We invite all our stakeholders to review our emissions report and join us in our efforts towards a more sustainable and circular future.
